L^AT_EX template and guidelines for preparing the manuscript of the invited talks

A. Author^{1,*}, B. Author², C. Author³, and D. Author⁴

¹*Nuclear Physics Division, Bhabha Atomic Research Centre, Mumbai - 400085, INDIA*

²*Department of Nuclear and Atomic Physics,*

Tata Institute of Fundamental Research, Mumbai - 400005, INDIA

³*Inter University Accelerator Centre, Aruna Asaf Ali Marg, New Delhi - 110067, INDIA and*

⁴*Physics Department, XYZ University*

This is the sample file using L^AT_EX style for submitting the manuscript of Invited Talks. The sample file for the Contribution(s) and Thesis work are available separately. An equivalent MS Word (*.doc file) version of the template is also available in the website for submission of manuscript. The manuscript of the invited talk should be of 2 pages of this style. The L^AT_EX format which has been chosen here mostly matches with that of Physical Review C format. The sample file from the aps website has been downloaded and modified so as to conform to our Symposium proceeding.

1. Introduction

manuscript.

The size of the figures and tables should not exceed the column width else it can be in two column width. When the figure is too wide for a single column, then use the **figure*** environment instead. Similarly for wide table one has to use **table*** environment.

2. Math and Equations

3. General Guidelines

Acknowledgments

We thank you for your co-operation in using this template for production of camera ready
