Under the guidance of

Dr. Sanjib Muhuri Scientific Officer

Experimental High Energy Physics Variable Energy Cyclotron Centre 1/AF, Bidhannagar, Kolkata, West Bengal, 700064

Summer Internship 2023

Acknowledgements

I want to express my profound gratitude to Dr. Sanjib Buhuri, who has served as my mentor and an outstanding role model during this endeavour. I appreciate him allowing me the chance to work with him and guiding me as I discover new ideas and themes. When we talked, he didn't simply explain the subjects; he also taught me how to approach the ideas in a way that wasn't solely based on mathematical proofs. For giving me this chance and inspiring me to investigate, I would also like to thank the Experimental High Energy Group at the Variable Energy Cyclotron Centre, Kolkata, and the School of Physical Sciences at the National Institute of Science Education and Research.

School Of Basic Sciences

INDIAN INSTITUTE OF TECHNOLOGY, MANDI

Certificate

This is to certify that Mr. Anantha Padmanabhan, Student of National Institute of Science Education and Research, has successfully completed a summer internship in the field of Group Theory from 5/06/2023 to 29/07/2023 under the guidance of Dr.Sanjib Muhuri. We wish him every success in his life and career.

Abstract

In this report we will discuss about the basics of the group theory and symmetries. The Group Theory is used as a mathematical frame work for describing symmetry properties of classical as well as quantum systems. We will also read about Homomorphisms-a structure-preserving map between two algebraic structures of the same type, Conjugations, and some applications of the Group theory in different fields like the crystallography and Topologies of the Group theory in the Group theory in different fields like the crystallography and Topologies of the Group theory in the Group theory in different fields like the crystallography and Topologies of the Group theory in the Group theory in different fields like the crystallography and Topologies of the Group theory is the Group theory in the Group theory in the Group theory is the Group theory in the Group theory in the Group theory is the Group theory in the Group theory in the Group theory is the Group theory in the Group theory in the Group theory is the Group theory in the Group theory in the Group theory is the Group theory in the Group theory in the Group theory is the Group theory in the Group theory in the Group theory is the Group theory in the Group theory in the Group theory is the Group theory in the Group theory in the Group theory is the Group theory in the Group theory in the Group theory is the Group theory in the Group theory in the Group theory is the Group theory in the Group the Group the Group the Group theory is the Group theory in the Group theory is the Group the Gro
